Non-Technical	Team player, self-organizable, creative
Familiar Tech	React.js, Vue.js, Weaviate, OPEN AI APIs, Chrome Extension, Node.js, Express.js

Education

Bachelor of Computer Science

Deenbandhu Chhotu Ram University Of Science and Technology,
Murthal 2020-2023

- **Relevant Coursework:** Web Programming, DS & Algo, Software Engineering, Soft Computing(Now), C++ OOP, DBMS, Software Testing.

3-Year Diploma in Computer Science

2017-2020

Guru Brahmanand Govt. Polytechnic Nilokheri, Karnal, Haryana
83%

Work Experience

Software Engineer , Instahyre

Aug 28 - 2023, Present - 2026

- Orchestrated the development of numerous features on the employer side, encompassing around 10 solutions, including the integration of custom mode search functionality, to refine hiring criteria and bolster access to candidates.
- Leveraged Angular, Python, Django, Elasticsearch, and related technologies to craft innovative features aimed at providing employers with comprehensive insights into candidate availability.
- Spearheaded the development of an Impression-based system, empowering employers to efficiently curate candidate pools based on relevance.
- Integrated cutting-edge functionality allowing employers to seamlessly publish live job listings, enhancing their recruitment capabilities with real-time engagement.
- Spearheaded the development and implementation of a "Make Job Live" feature, enabling employers to effortlessly launch job postings, optimizing the hiring process with efficiency and immediacy.

Software Developer Intern, Maximize AI

Feb 6, 2023 - June 7, 2023

- Developed ThunderClap AI, a Twitter Chrome extension for automated tweet generation using DOM manipulation and OpenAI APIs. Enhanced user productivity and engagement by dynamically generating tailored content based on real-time data analysis.
- Built a LinkedIn extension with streamlined content sharing and engagement capabilities, amplifying users' professional presence and networking opportunities.
- Created a website chatbot using GPT-4, Weaviate vector embedding, and Redis, enabling users to extract data and ask questions about the website. Leveraged natural language processing and advanced technologies to provide real-time, accurate responses.
- Contributed to the "Kollet" project, building a custom form builder for WhatsApp. Simplified data collection and sharing, empowering users to create customized forms and seamlessly collect responses through WhatsApp.
- Developed "Whisper Live," a real-time Google Meet translation tool, facilitating multilingual communication during virtual meetings. Enabled participants to communicate effectively in different languages, fostering global collaboration.

Full Web Stack Teacher, Delhi Skill Development Center (DSDC)

Feb 10 - 2023 , July 2 - 2023

- Instructed and mentored over 40 students in a comprehensive full-stack development course covering Python, Django, and React technologies over a period of 6 months.
- Designed and delivered engaging lessons and hands-on exercises to facilitate a deep understanding of HTML , CSS, Python, Django, and React concepts among students.
- Provided personalized guidance and support to students, ensuring their proficiency in both front-end and back-end development aspects.
- Cultivated a collaborative learning environment where students could actively participate and exchange ideas, fostering a dynamic and interactive classroom experience.
- Implemented innovative teaching strategies and utilized real-world examples to illustrate complex concepts, enhancing students' practical skills and problem-solving abilities.

Universal Network Of Infotech Internship

August 10, 2022-Sept 10,2022

- Tech Stack - **Python, Django, HTML, CSS, Javascript, Websockets, Bootstrap, Redis, Heroku, Git, GitHub.**
Developed and design a matrimonial web app functionality including sending invites, accepting invites, etc
